The reference in terms of safety and ergonomics

Global security

Ease of use

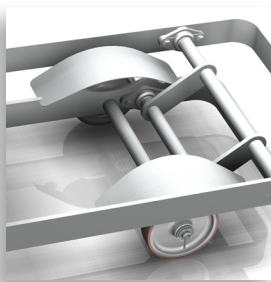

Durability

Exists
in
simple stack
and
double stack
versions

Global security

The trolley that takes care of the user: locking secure in load and two-handed unlocking to prevent risks, less effort to produce at the lifting and removal of the racks.

Ease of use

The trolley that simplifies use: The circulation is stable and fluid, protection against wheel projections, full accessibility for cleaning and visual control.

Durability

The stainless steel trolley which maintains its effectiveness constant: wear parts interchangeable, service kit (wheels and bearings), maintenance easy and economical on site.
