

The Servi Doryl technologist is an experienced cheese technician, who in addition provides his perfect knowledge of cheese moulds.

Technologist support A cheese technologist at your service

- For specific improvements and developments
- For resolving complex issues
- For prototype testing and making the best choice

Prototyping Make the right choice with complete safety

- For defining the ideal mould
- For testing a marketing concept
- Developed in the plant or as 3D printing

Audit of the set of cheese moulds

The eye of the expert

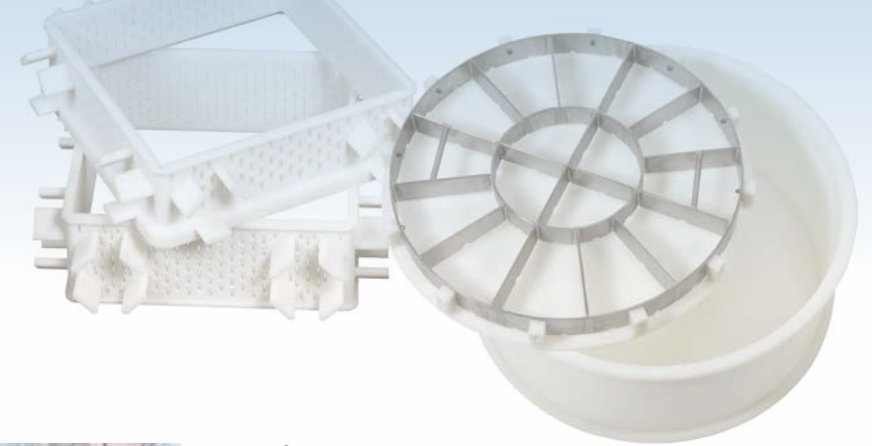

- Checking the integrity of the set, hygiene and cleaning
- Suggestion of preventive and corrective actions
- Report within 48 hours with advice from the expert
- Gains in productivity and in quality

Guarantee extension

Manufacture with complete peace of mind

- One or two additional years of guarantee
- Priority access to technical support
- Can be incorporated into a service contract

Maintenance and upgrading

A second life for your moulds

- Manufacturer's high-quality work
- In the Servi Doryl plant or on the customer's premises
- Optimised intervention times
- Increased service life

Service contract

Long-lasting serenity

- A customised contract
- For optimum use of moulds over time
- Combining a set of mould audit, technologist support, guarantee extension, etc.

The audit of the set of cheese moulds, with all of the controls that it entails, integrates perfectly into the preventive maintenance plan.

With the service contract, the interventions are scheduled in advance, the guarantee is extended. It is important to be able to use the moulds with complete serenity throughout their long service life.
