

DOUBLE-SIDED PLASTIC DRAINING TRAYS

Developed by Servi Doryl since 1993 to mechanise and secure the turning of cheese in stack, the double-sided plastic draining trays can replace stainless steel and aluminium trays.

They work for all cheese shapes and can be adapted to mechanised lines.

- Double-sided trays equipped with draining mats
 - Multiformat trays with integrated mats
 - Dedicated trays Moulding and draining of cheeses in moulds, blockmoulds of all shapes

- 500 x 622 mm internal
- 500 x 652 mm internal
- 469 x 718.5 mm internal
- 469 x 958 mm internal
- Other dimensions on request

Injected or boiled

copolymer polypropylene parts

BENEFITS:

- → Lightweight and easy to use trays
- → Excellent product durability
- → Fast return on investment
- → Channelled whey flow
- → Good ventilation on all the surfaces of the cheese
- → Possible to turn in stacks or individually
- → Safe movement on mechanised chains
- → Recyclable plastic materials, controlled recycling circuits
- → Possibility to take back trays at the end of their life
- → Reduction of the environmental footprint
