

SERVI DORYL

CHEESE MOULDS EXPERT

DRAINING TRAYS STAINLESS STEEL - ALUMINIUM

Designed and manufactured by Servi Doryl since 1972, the trays allow a peripheral draining by means of transverse grooves. They **can be used with a draining mat** and **are suitable for mechanised lines**.

Moulding and draining

- of cheeses in moulds, block-moulds of all shapes
- Single-sided trays
- Double-sided trays

- Length (stainless steel) : 995 mm
- Length (aluminium) : 1100 mm
- Width : 600mm
- Thickness (stainless steel) : 1.2 or 1.5 mm
- Thickness (aluminium) : 3 mm

Stainless steel or aluminium

BENEFITS :

- Made of stainless steel or aluminium
- Materials suitable for heavy products
- Very high rigidity
- Cleanability foreseen from the design phase
- Easy maintenance, fast drying
- Possibility of turning in stack with a double-sided model
- Safe movement on mechanised chains
- Optimum drainage
- Recyclable materials, controlled recycling circuits
- Possibility to take back trays at the end of their life
- Reduction of the environmental footprint
